

Strategic Partnerships and Alliances

Alliance to End Plastic Waste

We are proud to be a founding member of the Alliance to End Plastic Waste (AEPW). This organization is CEO led, cross-sector, not-for-profit made up of approximately 50 companies. The mission of the Alliance is clear: develop, accelerate, and deploy solutions, catalyze public and private investment, and engage communities to help end plastic waste in the environment. Our investments are focusing on infrastructure, innovation, education and clean-up initiatives.

Projects in some of the most challenging areas in need of support are well underway. Our early progress and traction is both encouraging and rewarding. To read about the Alliance's work in more detail, click here to view the Annual Report. In addition, we've provided summaries of a few of the projects in the AEPW Projects in the Planet section of this report. Or, to learn more visit: endplasticwaste.org

Operation Clean Sweep

Plastic waste in the environment is harmful to both people and wildlife. By committing to Operation Clean Sweep, Avient is dedicated achieving zero pellet, flake and powder loss in our manufacturing process.

UK Plastic Pact

In January of 2019, Avient joined The UK Plastics Pact, a collaborative initiative committed to tackling plastic pollution. The Pact was developed in collaboration with the Ellen MacArthur Foundation as the first in a global network of initiatives working toward the circular economy. We are committed to their goal of transforming the way the industry makes, uses, reuses and disposes of plastics.

PET Container Recycling Europe (PetCore)

PetCore works with all stakeholders to ensure the sustainable growth of PET as a packaging material of choice. As a committed member, we want to further increase post-consumer PET collection and recycling.

Association of Plastic Recyclers (APR)

APR promotes development of the plastics recycling industry by providing leadership for long-term industry growth and vitality. The organization strives to expand the post-consumer plastics recycling industry aimed at identifying and eliminating barriers to successful commercial recycling.
