Use 80-225t/cm (31-88t/cm) mesh screens for best performance.

Print with 1/16" or 2mm off contact.

Print two strokes to ensure the mesh is clear and you have a good ink deposit.

Flash between prints.

Clean the stencil area when stopped to prevent screen blockages.

Prints should be cured at 270°F /132°C for 60 seconds. Check the cure temp at the ink surface.
