

INCREASED rPET + PERFORMANCE

PACKAGING CONVERTER

rPET WATER BOTTLES

AVIENT SOLUTION

ColorMatrix™ SmartHeat™ RHC

WHY AVIENT?

- Provided the only reheat additive with APR Critical Guidance & Bottle-to-Bottle Recognition
- Allowed increased use of rPET with no negative impact to performance or aesthetics
- Enabled preforms to heat more quickly to improve cycle times and reduce energy usage
- Set up onsite dosing equipment for customer at multiple locations and provided technical support nationally

LEARN MORE

KEY REQUIREMENTS

- Reheat solution that meets APR Design® Recognition for Critical Guidance
- Increase rPET content used in production while minimizing yellowing and improving thermal stability
- Greater processability & blowing efficiency for lower energy consumption
