KEY REQUIREMENTS

• Diminish the growth of harmful microbes on surfaces without compromising product performance
• Achieve cohesive color across different polymeric materials with the addition of antimicrobial ingredients
• Accelerate product development timeline

SAFETY + PREVENTION

PERSONAL CARE DEVICES

PATIENT MOBILITY

AVIENT SOLUTION

Cesa™ WithStand™ Antimicrobial Additives with OnColor™ Colorants

WHY AVIENT?

• Preserved polymer performance by minimizing undesirable microbes
• Designed a masterbatch solution that achieved color harmony between diverse polymeric materials even with the addition of antimicrobial ingredients
• Accelerated speed to market by several weeks with Avient’s pre-tested material and supplier expertise while reducing costs of lab testing fees by up to $50,000
