1. PRODUCT AND COMPANY IDENTIFICATION

POLYONE CORPORATION
33587 Walker Road, Avon Lake, OH 44012

Telephone : Product Stewardship (440) 930-1395
Emergency telephone number : CHEMTREC 1-800-424-9300 (24hrs for spill, leak, fire, exposure or accident).

Product name : GEON B70CB BRN 3587
Product code : B70CB00B3587
Chemical Name : Mixture
CAS-No. : Mixture
Product Use : Industrial Applications

3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

This mixture has not been evaluated as a whole. All ingredients are bound and potential for hazardous exposure as shipped is minimal. However, some vapors may be released upon heating or processing. The end-user (fabricator) must take the necessary precautions (mechanical ventilation, respiratory protection, etc.) to protect employees from exposure. See sections 8 and 11 for special precautions. May emit Hydrogen Chloride (HCl) or Carbon Monoxide (CO) under fire conditions.

POTENTIAL HEALTH EFFECTS

Routes of Exposure: Inhalation, Ingestion, Skin contact

Acute exposure

- Inhalation: Resin particles, like other inert materials, can be mechanically irritating.
- Ingestion: May be harmful if swallowed.
- Eyes: Resin particles, like other inert materials, are mechanically irritating to eyes.
- Skin: Experience shows no unusual dermatitis hazard from routine handling.

Chronic exposure: Refer to Section 11 for Toxicological Information.
POLYONE CORPORATION

MATERIAL SAFETY DATA SHEET

GEON B70CB BRN 3587

Medical Conditions Aggravated by Exposure: None known.

4. FIRST AID MEASURES

Inhalation: Move to fresh air in case of accidental inhalation of fumes from overheating or combustion. When symptoms persist or in all cases of doubt seek medical advice.

Ingestion: Do not induce vomiting without medical advice. When symptoms persist or in all cases of doubt seek medical advice.

Eyes: Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. If eye irritation persists, seek medical attention.

Skin: Wash off with soap and plenty of water. If skin irritation persists seek medical attention.

5. FIRE-FIGHTING MEASURES

Flash point: Not applicable

Flammable Limits
   Upper explosion limit: Not applicable
   Lower explosion limit: Not applicable

Autoignition temperature: Not applicable

Suitable extinguishing media: Carbon dioxide blanket, water spray, dry powder, foam

Special Fire Fighting Procedures: Fullface self-contained breathing apparatus (SCBA) used in positive pressure mode should be worn to prevent inhalation of airborne contaminants.

Unusual Fire/Explosion Hazards: May emit Hydrogen Chloride (HCl) or Carbon Monoxide (CO) under fire conditions. Carbon dioxide (CO2), carbon monoxide (CO), oxides of nitrogen (NOx), other hazardous materials, and smoke are all possible.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions: Wear appropriate personal protection during cleanup, such as impervious gloves, boots and coveralls.

Environmental precautions: Should not be released into the environment. The product should not be allowed to enter drains, water courses or the soil.

Methods for cleaning up: Clean up promptly by sweeping or vacuum. Package all material in plastic, cardboard or metal containers for disposal. Refer to Section 13 of this MSDS for proper disposal methods.

7. HANDLING AND STORAGE
### Handling
Take measures to prevent the build up of electrostatic charge. Heat only in areas with appropriate exhaust ventilation. Processing fume condensates may contain combustible or toxic residue. Periodically clean hoods, ducts, and other surfaces to minimize accumulation of these materials.

### Storage
Keep containers dry and tightly closed to avoid moisture absorption and contamination. Keep in a dry, cool place.

### 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

<table>

</tr>
<tr>
<td>General Hygiene Considerations</td>
<td>Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday. This product may contain residual vinyl chloride monomer (VCM) (CAS number 75-01-4) below 8.5 ppm (0.00085%). It is unlikely, under normal working conditions with adequate ventilation, that the exposure limits will be exceeded for residual VCM. However, the user should take the necessary precautions (e.g. mechanical ventilation, local exhaust ventilation, air-monitoring, respiratory protection, etc.) to ensure airborne levels of any vapors including VCM or dusts that may be released during heating or processing are below regulated levels.</td>
</tr>
<tr>
<td>Engineering measures</td>
<td>Heat only in areas with appropriate exhaust ventilation. Provide appropriate exhaust ventilation at machinery.</td>
</tr>
<tr>

</tr>
</tbody>
</table>

10. STABILITY AND REACTIVITY

Stability: Stable.

Hazardous Polymerization: Will not occur.

Conditions to avoid: Keep away from oxidizing agents and open flame. To avoid thermal decomposition, do not overheat.

Incompatible Materials: Incompatible with strong acids and oxidizing agents. Avoid contact with acetal homopolymers and acetal copolymers during processing.

Hazardous decomposition products: Carbon dioxide (CO2), carbon monoxide (CO), oxides of nitrogen (NOx), other hazardous materials, and smoke are all possible. Prolonged heating (approximately 30 minutes or more) above 392 °F (200 °C) or short term heating at 482 °F (250 °C) may result in product decomposition and evolution of carbon monoxide and hydrogen chloride.

11. TOXICOLOGICAL INFORMATION
This mixture has not been evaluated as a whole for health effects. Exposure effects listed are based on existing health data for the individual components which comprise the mixture.

**Toxicity Overview**
This product contains the following components which in their pure form have the following characteristics:

<table>
<thead>
<tr>
<th>CAS-No.</th>
<th>Chemical Name</th>
<th>Effect</th>
<th>Target Organ</th>
</tr>
</thead>
<tbody>
<tr>
<td>14807-96-6</td>

<td>no</td>
</tr>
</tbody>
</table>

**IARC Carcinogen Classifications:**
1 - The component is carcinogenic to humans.
2A - The component is probably carcinogenic to humans.
2B - The component is possibly carcinogenic to humans.

**NTP Carcinogen Classifications:**
1 - The component is known to be a human carcinogen.
2 - The component is reasonably anticipated to be a human carcinogen.

**12. ECOLOGICAL INFORMATION**

**Persistence and degradability**: Not readily biodegradable.

**Environmental Toxicity**: Adverse ecological impact is not known or expected under normal use.

**Bioaccumulation Potential**: No data available

**Additional advice**: Not applicable

**13. DISPOSAL CONSIDERATIONS**

**Product**: Like most thermoplastic plastics the product can be recycled. Where possible recycling is preferred to disposal or incineration. The generator of waste material has the responsibility for proper waste classification, transportation and disposal in accordance with applicable federal, state/provincial and local regulations.

**Contaminated packaging**: Recycling is preferred when possible. The generator of waste material has the responsibility for proper waste classification, transportation.
and disposal in accordance with applicable federal, state/provincial and local regulations.

### 15. REGULATORY INFORMATION

**US Regulations:**

- **OSHA Status**: Classified as hazardous based on components.
- **TSCA Status**: All components of this product are listed on or exempt from the TSCA Inventory.

**US. EPA CERCLA Hazardous Substances (40 CFR 302)**

Not applicable

**California Proposition 65**: Not applicable

**SARA Title III Section 302 Extremely Hazardous Substance**

Unless specific chemicals are identified under this section, this product is Not Applicable under this regulation

**SARA Title III Section 313 Toxic Chemicals**: Unless specific chemicals are identified under this section, this product is Not Applicable under this regulation

**Canadian Regulations:**

**National Pollutant Release Inventory (NPRI)**
