Forward-Looking Statements

In this presentation, statements that are not reported financial results or other historical information are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements give current expectations or forecasts of future events and are not guarantees of future performance. They are based on management’s expectations that involve a number of business risks and uncertainties, any of which could cause actual results to differ materially from those expressed in or implied by the forward-looking statements. They use words such as “will,” “anticipate,” “estimate,” “expect,” “project,” “intend,” “plan,” “believe,” and other words and terms of similar meaning in connection with any discussion of future operating or financial performance and/or sales.

Factors that could cause actual results to differ materially from those implied by these forward-looking statements include, but are not limited to:

- The final amount of charges resulting from the planned North American asset realignment and the Company’s ability to realize anticipated savings and operational benefits from the asset realignment;
- Our ability to achieve the strategic and other objectives relating to the acquisition of Spartech Corporation, including any expected synergies;
- Our ability to successfully integrate Spartech and achieve the expected results of the acquisition, including, without limitation, the acquisition being accretive;
- Disruptions, uncertainty or volatility in the credit markets that could adversely impact the availability of credit already arranged and the availability and cost of credit in the future;
- The financial condition of our customers, including the ability of customers (especially those that may be highly leveraged and those with inadequate liquidity) to maintain their credit availability;
- The speed and extent of an economic recovery, including the recovery of the housing market;
- Our ability to achieve new business gains;
- The effect on foreign operations of currency fluctuations, tariffs, and other political, economic and regulatory risks;
- Changes in polymer consumption growth rates in the markets where we conduct business;
- Changes in global industry capacity or in the rate at which anticipated changes in industry capacity come online;
- Fluctuations in raw material prices, quality and supply and in energy prices and supply;
- Production outages or material costs associated with scheduled or unscheduled maintenance programs;
- Unanticipated developments that could occur with respect to contingencies such as litigation and environmental matters;
- An inability to achieve or delays in achieving or achievement of less than the anticipated financial benefit from initiatives related to working capital reductions, cost reductions, employee productivity goals, and an inability to raise or sustain prices for products or services;
- An inability to raise or sustain prices for products or services;
- An inability to maintain appropriate relations with unions and employees;
- The inability to achieve expected results from our acquisition activities;
- Our ability to continue to pay cash dividends;
- The amount and timing of repurchases of our common shares, if any; and
- Other factors affecting our business beyond our control, including, without limitation, changes in the general economy, changes in interest rates and changes in the rate of inflation.

The above list of factors is not exhaustive.

We undertake no obligation to publicly update forward-looking statements, whether as a result of new information, future events or otherwise. You are advised to consult any further disclosures we make on related subjects in our reports on Form 10-Q, 8-K and 10-K that we provide to the Securities and Exchange Commission.
Use of Non-GAAP Measures

- This presentation includes the use of both GAAP (generally accepted accounting principles) and non-GAAP financial measures. The non-GAAP financial measures include: adjusted EPS, earnings before interest, tax, depreciation and amortization (EBITDA), adjusted EBITDA, net debt, Specialty platform operating income, Specialty platform gross margin percentage, adjusted operating income, return on invested capital, net debt/EBITDA, and the exclusion of corporate charges in certain calculations. In certain cases throughout this presentation.

- PolyOne’s chief operating decision maker uses these financial measures to monitor and evaluate the ongoing performance of the Company and each business segment and to allocate resources. In addition, operating income before special items and adjusted EPS are components of various PolyOne annual and long-term employee incentive plans.

- A reconciliation of each non-GAAP financial measure with the most directly comparable GAAP financial measure is attached to this presentation which is posted on our website at www.polyone.com.
PolyOne Commodity to Specialty Transformation

2000-2005

- Volume driven, commodity producer
- Heavily tied to cyclical end markets
- Performance largely dependent on non-controlling joint ventures

2006 - 2009

- Steve Newlin appointed, Chairman, President and CEO
- New leadership team appointed
- Implementation of four pillar strategy
- Focus on value based selling, investment in commercial resources and innovation to drive transformation

2010 – 2014

- 21 consecutive quarters of double-digit adjusted EPS growth
- Shift to faster growing, high margin, less cyclical end markets
- Key acquisitions propel current and future growth, as well as margin expansion
- Established aggressive 2015 targets

2015 and beyond

- Continue specialty transformation
- Vitality index and innovation driving growth and expanding margins
- Specialty business margins have 20+% potential
- Double digit operating income and adjusted EPS growth
Mix Shift Highlights Specialty Transformation

Application Examples
PET Bottling Technology

Market Opportunity

- $1.5 billion attractive, growing market
- Additives improve performance and reduce cost through light-weighting, reduced waste, faster cycle times, and extended shelf life of finished product
- Aligned with megatrend of protecting the environment:
  - Sustainability benefits include lower package weight and improved recyclability of package at end of use

Leading Global Supplier of Additives in Fast Growing PET Market

PET 2008-13P CAGR

- Western Europe: 4%
- North America: 4%
- South America: 8%
- MEA: 9%
- Easter Europe: 9%
- Asia Pacific: 10%
- China: 11%
- India: 14%
Authentication Technology

• Includes formulation and consultative services to assist manufacturers and brand owners in positively identifying their finished goods

• Protects brand equity & consumer welfare

• Reduces exposure to unwarranted recall expenses

• Secures supply chain integrity – support for safe expansion into new geographies
Range Rover Evoque Interior

• Color harmonization across 15 unique color-and-polymer combinations

• Eliminated need for multiple pre-colored materials

• Reduced Land Rover’s working capital
CT Scanner

- Reduced health and environmental impact
- System cost reduction
- Radiation-shielding performance
- Parts consolidation
- Design freedom
Metal Replacement Solutions

• Replaces metal in LED lighting
• Extends LED durability and life span eliminating hot spots
• Greater design flexibility with fewer parts
• Weight reduction
• Simplifies manufacturing and lowers total production cost
Next Generation Solar Charger

- Ginkgo Solar Tree charger utilizing our unique reSound™ material

- reSound™ is a durable material consisting of 50% bio-derived plastic and 50% traditional petroleum-based plastic

- Use of reSound™ reduced the carbon footprint for this product by 35%

- reSound™ is classified as a PolyOne Sustainable Solution™
High-Barrier Packaging Containers

- Capability to extrude up to 13 layers
- Strong oxygen and moisture vapor transmission protection
- Can be made symmetrical or asymmetrical to meet customized needs of broad variety of applications
- Barrier protection and superior organoleptic properties
Aerospace Applications

- Leading provider of specialty materials for the aerospace industry

- Typical applications
  - Mil-spec aircraft windows, canopies, windscreens, instrument panels, wingtip lenses
  - Interior – gallery furnishings, tray tables, arm rests, trim strips, joint/edge coverings

- Benefits:
  - High impact strength
  - Resistant to UV rays
  - Flame and smoke compliance
  - Easy to clean with aggressive cleaners; anti-microbial grades available
  - Range of sizes, thicknesses, colors, etc.
Below is a reconciliation of non-GAAP financial measures to the most directly comparable measures calculated and presented in accordance with U.S. GAAP. Senior management uses adjusted operating income, adjusted EPS, and working capital to assess performance and allocate resources because senior management believes that these measures are useful in understanding current profitability levels and that current levels may serve as a base for future performance.
